Name:	**Miss. SHAMBHAVI KHANNA**	Registration No.:	159744
Age/Gender:	24 Y/Female	Registration Time:	09/Dec/2025 10:25AM
Patient ID:	012512090012	Collection Time:	09/Dec/2025 11:26AM
BacodeNo:	10199435	Reported:	10/Dec/2025 01:21PM
Referred By:	Dr. AMITABH KHANNA	Report Status:	Final

IMMUNOLOGY

Test Name	Result	Unit	Biological Ref.Interval	Method
***TESTOSTERONE FREE,Serum**				
TESTOSTERONE FREE	1.07	ng/dL	0.06-1.08	CLIA

Comment:
This test estimates the free testosterone levels in serum . Testosterone is a steroid hormone (androgen) made by the testes in males. Testosterone is also produced by the adrenal glands in both males and females and, in small amounts, by the ovaries in females. In males, a decreased testosterone level may indicate hypothalamic or pituitary disease or damage to the testes

The concentration of free testosterone is very low, typically <2% of the total testosterone concentration. In most men and women, >50% of total circulating testosterone is bound to sex hormone-binding globulin, SHBG, and most of the rest is bound to albumin.

This test has been outsourced to Noble Diagnostics ,New Delhi.
